11 september, 2011

Dear Ian and Nick

Thank you for proposing me to participate to your project "Shared framework for next-generation ice sheet modelling". It sounds a very interesting and useful project and I am happy to commit myself to attend the meetings.

I developed myself an ice sheet model (GRISLI) and another one (ELMER/Ice) is currently used in my team in Grenoble. Moreover, GRISLI is presently coupled with two EPICS models (CLIMBER 2, and LOVECLIM) and should be soon coupled with GMSs. I am thus fully aware of the need of sharing experience about coupling procedures. I also hope that this project will strengthen collaboration between the various groups working on this topic.

Best regards

Catherine Ritz
